## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-7 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3, and 6 of U.S. Patent No.

5,867,580. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to one of ordinary skill in the art to use two switches instead of the claimed at least one switches for making sounds selection as defined in claim 1. Although only one memory is being claimed in claim 1, the same memory can be read to be two separated memories as long as the same memory has more than one address. The difference between claim 3 of the instant application and claim 3 of patent '580 is the broader limitation in the instant application. However, this broader limitation, at least some of the first and second pluralities of prerecorded sounds may be selected by means of said at least one user input device, is covered by patent '580. The difference between claim 4 of the instant

application and claim 6 of patent '580 are the broader limitations in the instant application. However, these broader limitations, "at least one of intermittent-type sounds being constituted by multiple, different, complete-in-itself versions", and "selected for replay, ... at a selected time", are covered by patent '580. Claim 7 of the instant application is the modification of claim 1 with additional limitation from claim 3.
